

WHAT'S NEW

Omo Naija

A loud, pass-the-phone party game for friends and family. One team describes Nigerian slang, food, and culture while their teammates shout out guesses before the timer runs out. Won cards stack up per team, and a winner is crowned at the end. Works on your phone, tablet, or computer -- and once installed, it works **fully offline**.

HOW A GAME GOES

Five simple steps

1

Set up

Add your teams (2-6), pick a timer, a mode, a skip rule, a win condition, and a word bank.

2

Pass the phone

Pass it to the team whose turn it is. One person is the clue-giver; the rest guess.

3

Got it! or Skip

Tap Got it! (or swipe right) for each correct guess. Tap Skip (or swipe left) to move on.

4

End of turn

When the timer buzzes you'll see that team's score, then the phone moves to the next team.

5

End game

Tap End game any time to jump to the winner reveal -- podium, counting scores, and confetti.

*There's a **How to play** screen inside the app too (button on the home screen).*

SETTINGS

What you can tweak

Teams

2 to 6, each with its own colour. Rename them however you like.

Timer

30, 60, or 90 seconds per turn.

Skips

Free (no cost), Limited (3 per turn), or Penalty (-1 point).

Winning

Open-ended, First to a score, or a Fixed number of rounds.

Modes

It's honour-system -- the app shows the rule but trusts you.

Green

Describe using only 3 words + gestures (harder).

Grey

Describe however you like (easier).

Mixed

Each card tells you which mode applies.

Tip: After a turn, on the summary screen (with Free skips) you can tap any card to flip it between *won* and *skipped* if someone mis-tapped -- the score updates live.

WORD BANKS

Built-in banks and your own

Omo Naija comes with two built-in banks: **Naija Classic** and **Naija Gen-Z**. Pick one at game setup.

Make your own bank

Go to **Settings > Word banks > Add word bank**:

- Give it a name (e.g. Office Party).
- Type your words, one per line. Add an optional hint after a | (vertical bar).
- Tap + Add word bank.

Example -- what to type in the words box:

Jollof | the famous rice dish

Danfo | yellow Lagos bus

Owambe | a big lavish party

Suya | grilled spicy meat

Gele

Aso ebi

That makes a 6-word bank. Hints are optional -- *Gele* and *Aso ebi* above have none, and that's fine. Keep words plain text (no emoji) so they show up cleanly everywhere.

Delete a bank

In **Settings > Word banks**, tap the x next to any bank you created -- you'll be asked to confirm. The two built-in banks (Naija Classic and Naija Gen-Z) stay put.

INSTALL

Put it on your phone

Open the app link in your phone's browser, then choose Add to Home Screen

It installs like a normal app -- its own icon, full screen, and it keeps working even with **no internet**. Your settings and any game in progress are saved on your device, so you can close it and pick up right where you

left off.

Enjoy, and may the best team chop the win. No wahala.
